SKILLS

Languages:	Python 3.13, C++, JavaScript, C, PHP, Java
Frameworks:	HTML and CSS, Bootstrap, NodeJS, React
Tools/Platforms:	MySQL, MongoDB, Docker
Soft Skills:	Team Empowerment, Persuasive public Speaking, Quick Learning

TRAINING

Data Structures & Algorithms Training (Angaar Batch) | w3schools Jun' 25 – Jul' 25

A comprehensive 4-week online curriculum on the w3schools platform

- Strengthened algorithmic proficiency by solving 200+ DSA problems covering arrays, trees, graphs, and DP, improving problem solving speed by over 30 percent.
- Created optimized Java and C++ solutions with consistent $O(\log n)$ or $O(n)$ performance by applying time and space complexity analysis to redesign naive approaches.
- Improved competitive programming accuracy by practicing advanced topics such as DP and backtracking, boosting test case pass rate across platforms.
- Tech:** CPP, DSA

PROJECTS

PDF Structure Extraction (Adobe Hackathon 2025) | Hierarch-Engine Jun' 25 – Jul' 25

- Built an offline PDF structure engine that achieved 92 percent accurate hierarchy extraction across unstructured documents by combining metadata detection with custom font metric analysis.
- Implemented a dual-layer parsing pipeline that reduced parsing failures by 40 percent through automatic fallback to heuristic typography analysis.
- Increased classification reliability by modeling font size and weight distributions to infer logical document levels.
- Packaged the project using Docker to ensure 100 percent reproducible, cross-platform execution across hackathon-restricted offline environments.
- Tech:** Python, PyMuPDF (fitz), Docker, Algorithmic Logic

Algo Visualizer | React, DSA Algorithms Nov' 24 – Dec' 24

- Built an interactive web-based tool to visualize core Data Structures & Algorithms in real time, improving learning efficiency for 200+ users.
- Implemented 10+ algorithms and optimized React state updates, reducing lag by 25%.
- Designed a clean, intuitive UI/UX enabling faster algorithm selection and customization, improving user task completion time by 30%.
- Used optimized React state management to achieve 40% smoother visual playback.
- Tech:** React, JavaScript, HTML/CSS, Algorithmic Logic, State Management Techniques

CERTIFICATES

SQL(Intermediate) – HackerRank	Oct' 2025
Master DSA with Java/C++ – W3Schools	Jul' 2025
Privacy and Security in Online Social Media – NPTEL	Apr' 2025

ACHIEVEMENTS

Adobe Hackathon 2025 Distinction Jul' 2025

Advanced to Round 3 in high-stakes national algorithmic challenge Among 2.6L Students.

Competitive Programming Excellence Oct' 2025

Earned 5-Star Gold Badge; 4-Stars in React/Problem-Solving/Java/C/Python

EDUCATION

Lovely Professional University Bachelor of Technology - Computer Science and Engineering; CGPA: 7.0	Phagwara, Punjab Since Aug' 2023
Guru Harkrishan Senior Secondary Public School Intermediate; Percentage: 65	Hanumangarh, Rajasthan Apr' 2021 – Mar' 2023
Little Flower Convent School Matriculation; Percentage: 89	Hanumangarh, Rajasthan Apr' 2014 – Mar' 2021
